

Definition of Done

For Maintenance Team (Handover)

Handover is completed once all the below points are done.

- Code is merged in qa branch
 - Mail is dropped to the maintenance team for its job creation and inclusion in daily regression suite execution with its expected user execution.
 - Script passes in execution for a week.
 - Scripts with existing defects should pass when the defect is resolved.
- If script fails due to error in common/basic methods. It can be ignored.
 - Please keep an eye on QA Regression execution mail to check your merged scripts for execution status.
